

Phase 14B.1 current-dependent network feasibility freeze

current-model components

0 frozen from phase 14B
declared for phase 14B
shared global optimization solver
frozen shared optimization
thermal_feedback_absent

parameter role ledger

0 shared_fit_or_shared_scan
measured_device_metadata
prohibited_until_phase14C

solver status contract

0 converged
maximum_iterations_reached
state_cycle_detected
singular_branch_current
invalid_branch_current

Phase 14B.2 limiting cases

0 LC1 single link switch
LC2 parallel path redistribution
boundary bottleneck multistage
LC3 LC4 positive negative symmetry
LC5 LC6 LC7 high current dissipation
LC8 solver_convergence_no_cycle

frozen nonlinear policy

Phase 14B.1 gates

pass fail
