

Future mechanics map

geometry + stack + stress + interface

$u(x,y,z) \rightarrow \epsilon(x,y,z)$

first scope: ϵ_x , ϵ_y , ϵ_z

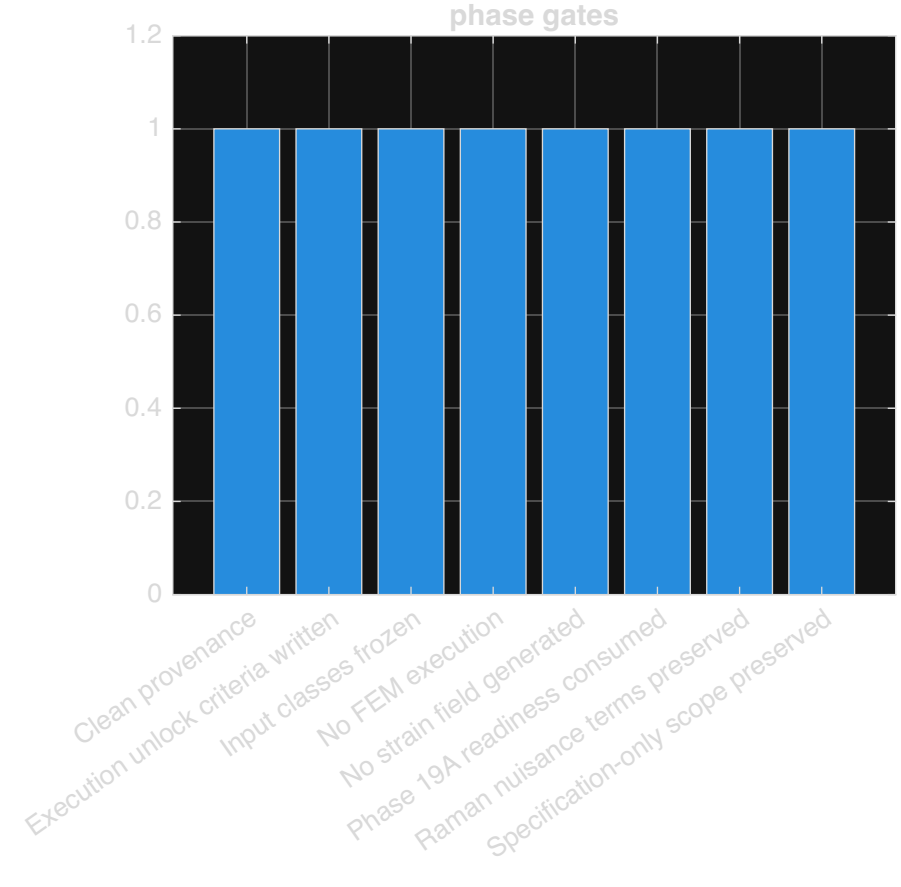

Raman observable

$\Delta\omega = K:\epsilon + \text{nuisance}$

doping, thickness, interface, optical

temperature, calibration offsets

Phase 19B status

specification only

FEM execution allowed: false

next: Phase 19C input recovery
